Research Seminar A - Raising Awareness of the system: A structural attributions intervention tournament

Responsible: Dr. Edward Clarke

- An underexplored aspect of people's solution-oriented responses to the climate crisis is how people attribute cause for climate change. People who are more likely to blame climate change on structural factors such as (lack of) government regulation, power imbalances and capitalism are more likely to support system change and government climate policy, and are more willing to engage in activist behaviours. Given the need for drastic action on climate change, attributions present as a promising avenue for research.
- In this ExPra we will trial different forms of system-level thinking interventions to determine which intervention is most likely to raise cognitive awareness of the role of structures in climate change. To do this, you will be placed into small groups and be part of a mini-tournament, with the task of designing and testing your own (evidence-based) system-thinking intervention.

B-BM-Übung B

Beratung und Mediation

Responsible: Tuerxunhazi Yeerzhati

- t.b.a

B-VBWSa-Seminar B

Psychopharmacology

Responsible: Prof. Dr. Markus Wöhr

- t.b.a

B-VBWSb-Seminar A

Memory

Responsible: M. Sc. Lisa Marie Widmayer

- How does the human memory work and how can we investigate it? In this course, we will address selected topics from the psychology of memory. For this, we will work with scientific papers and guiding questions that we discuss during the seminar sessions.
- Participants hand in short texts (German or English) in which they summarize the discussed topics by the end of the semester in order to pass the course.

B-VBWSb-Seminar B

Responsible: M. Sc. Dhanaraaj Raghuvier

- t.b.a

B-VBWS-Sc-Seminar A and D

Social Psychology of Climate Change

Responsible: Dr. Edward Clarke

- In this seminar we will utilise social psychological theory and research to develop an understanding of how people conceptualise, and behave in response to, one of humanity's greatest challenges - climate change. Theoretical perspectives in social psychology will guide our exploration of the formation of climate change beliefs, drivers of private-sphere environmental behaviours and collective action behaviours. This seminar will also adopt a critical perspective toward the current state of climate psychology as a discipline of research, with possible future directions in research discussed.
- The aim of this seminar is to highlight the importance of social psychology in helping us to understand how people engage with the challenge of climate change and the factors that promote pro-climate action. This will provide students with an understanding of how social psychological theories can be applied to real-world contexts of particular importance.

Diversity

Responsible: Tijana Karić Zorić

- One of the most pressing challenges for societies today is to handle diversity within and across their borders. For example, today about 30% of all individuals living in Germany have a migration background. Apart from diversity based on ethnic origin, a group of people can be diverse with respect to various characteristics like culture, religion, gender, age, ability etc.
- Although diversity is often regarded as a challenge, it is also an opportunity allowing cultural exchange and broadening creative capacities. In this seminar, you will develop an intervention or a program rooted in knowledge of social psychology, to respond to real-life challenges to diversity. We will cover relevant theoretical bases, possible intervention strategies, as well as empirical findings.

M-WPa-Vorlesung

Diversity (first half of the semester)

Responsible: Prof. Dr. Christopher Cohrs

- The lecture aims at deepening students' knowledge of individual, structural, and organizational causes of diversity. In addition, after participation, students will know about the psychological consequences of diversity as well as the opportunities and limitations of a constructive handling of diversity. Students will be able to identify practical problems connected with diversity and to develop, implement, and evaluate intervention strategies.

M-WPb-Vorlesung

Change Management (second half of the semester)

Responsible: Prof. Dr. Kathleen Otto

- The lecture aims at deepening students' knowledge of individual, structural, and organizational causes of heterogeneity and change. In addition, after participation, students will know about the psychological consequences of heterogeneity as well as the opportunities and limitations of a constructive handling of diversity and change. Students will be able to identify practical problems connected with heterogeneity and to develop, implement, and evaluate intervention strategies.

M-AOWa-Hauptseminar C

Workplace Health Promotion

Responsible: Andrew Shin, M. Sc.

- t.b.a

Theoretical Neuroscience

Responsible: Benjamin Knopp

- t.b.a

Sensorimotor skills and motor skills in naturalistic and natural environments

Responsible: Benjamin Knopp

- This seminar will explore the fundamental theories of motorics and sensorimotor coupling in both artificial and biological systems. A broad computational perspective will be taken, covering topics such as optimal control, reinforcement learning, and embodied approaches. The seminar will examine the relationships between perception, action, and learning in complex systems.

Changes to your chosen courses after the course registration deadline

- Psychology:
 - During the first two weeks of the lecture period
 - To get in the course: ask the lecturers, if this is possible
 - To drop a course: let the lecturer know
 - To register / un-register: we will send a form in **late October**
- Other departments:
 - Ask the coordinator of that department

Belegliste – the most important document for your academic stay!

See also: <https://www.uni-marburg.de/de/international/ausdem-ausland/studierende/transcript>

If you don't have a digital Learning Agreement (dLA)

During the first few weeks of the semester:

Create your Belegliste in Mobility Online; for Psychology courses make sure that they are listed in “Marvin-My enrollments”. **During the semester, keep the list updated if you change courses!**

By the deadline provided by the International Office

Make sure that the “Belegliste” is filled out completely, confirm the correctness of all entered information (for example course title, course number etc.) in Mobility online and submit the final version of the Belegliste, i.e. make sure that we can access it and make entries.

After completing the course (*everyone, also those who did a dLA*)

Make sure that for each course the lecturer emails a grade (or „passed”) and the ECTS to erasmusstudent4@uni-Marburg.de (if you have any difficulties reaching them – let us know as well !).

Last step:

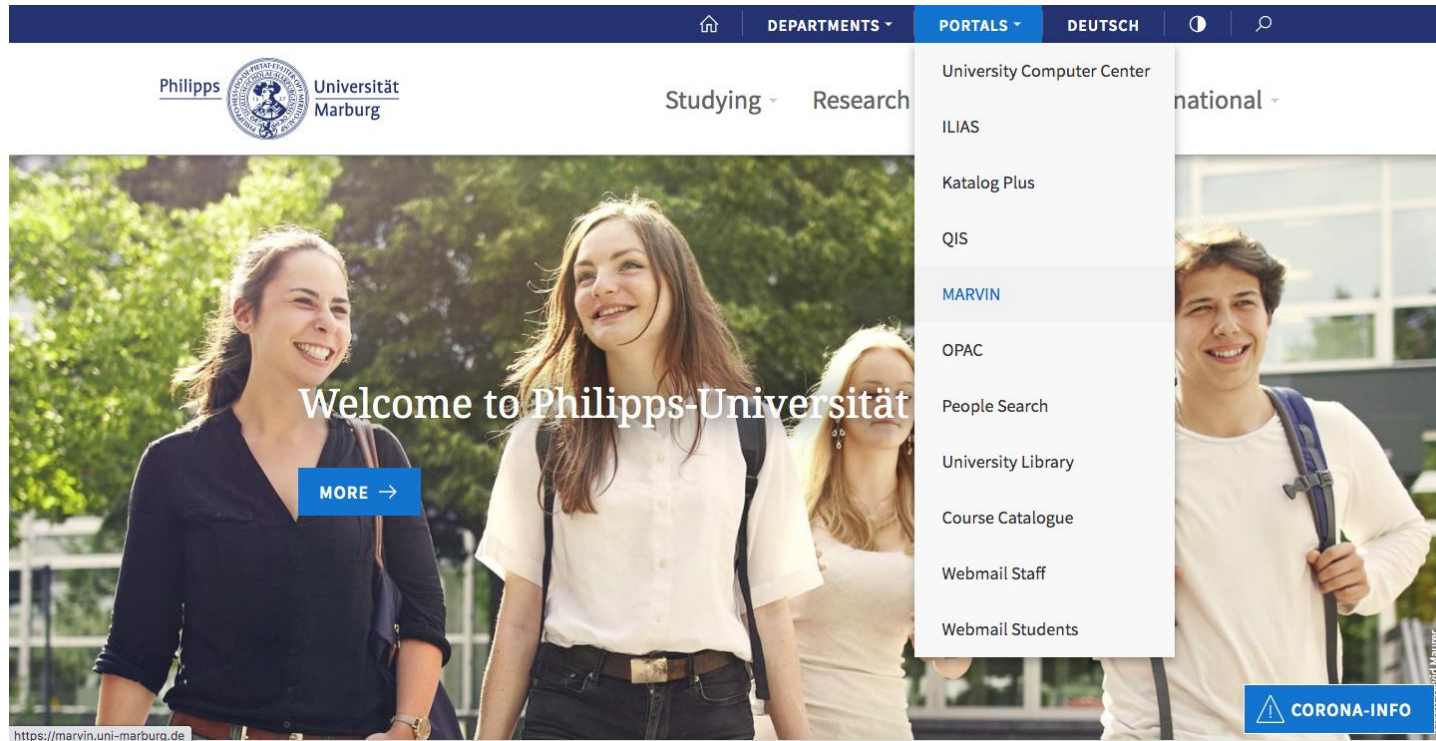

We enter the grades and ECTS from your Belegliste into our database to enable the examination office to print the **Transcript of Record** and **sent it to you and your home university.**
